

KEY INVESTOR INFORMATION

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Morant Wright Fuji Yield Fund (the "Fund"), Euro Accumulating Hedged Class, a fund within Morant Wright Funds (Ireland) plc (ISIN: IE00BQ5BN330)

The Fund is managed by Waystone Management Company (IE) Limited.

Objectives and Investment Policy

Objective

The Fund's primary investment objective is longer term income growth while also seeking to preserve and increase its capital value through diversified investment in a portfolio of Japanese equities and related instruments which generate a yield above the market average.

Investment Policy

The Fund is actively managed and seeks to achieve its investment objective by investing in the equity securities of companies listed, or regularly traded on, a Japanese stock exchange. The Fund may also retain amounts in cash pending reinvestment.

Essential features of the Fund:

- The Fund is considered to be actively managed in reference to TOPIX Net Total Return Index (the "Benchmark") by virtue of the fact that it uses the Benchmark for performance comparison purposes. Certain of the Fund's securities may be components of and may have similar weightings to the Benchmark. However the Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.
- The Investment Manager has discretion over the assets held within the Fund. Investments are selected purely on the basis of whether they meet the Investment Manger's criteria of identifying strong but undervalued Japanese equity securities with no reference to specific sectors or indices.
- The Fund uses currency forward contracts to hedge the exposure of the base currency of the share class against the Yen denominated assets.
- You can buy and sell shares in the Fund on each business day.
- Income from the Fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a Fund has risen and fallen in the past, and therefore how much a Fund's returns have varied. It is a measure of the Fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is a risk free investment.
- The Fund has been classed as 6 because its volatility has been measured as high risk.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The risk and reward indicator does not take into account the following risks:
- The Fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Stocks of small and mid-size companies can be more volatile than stocks of larger companies and become difficult to sell in stressed market conditions.
- As this Fund is invested in a particular geographical region (Japan), you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment. At any given time, for instance, a growth-style portfolio may outperform a value-style portfolio, or vice-versa, and either may at any time underperform the market as a whole.
- Currency Risk: As the fund invests in Japanese securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

Charges for this fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the Sub-Fund over the year	
Ongoing Charges	1.28%
Charges taken from the Sub-Fund under certain specific conditions	
Performance Fee	None

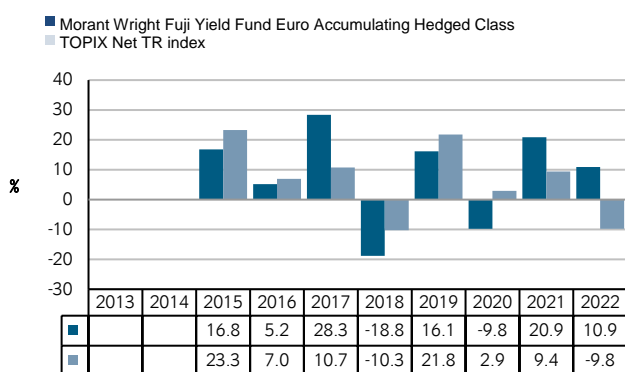

For more information about charges, please see the prospectus and supplement to the prospectus 'Fees and Expenses' sections, which may be obtained free of charge from the address in 'Practical Information' below.

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is based on expenses for the year as at 31st December 2022. This figure may vary from year to year. The Fund's annual report for each financial year will include detail on the exact charges made. The ongoing charges are taken from the assets of the Fund which exclude portfolio transaction costs.

You may also be charged a dilution levy on entry to or exit from the Fund. The average dilution levy charged in the past financial year was 0.00%.

Past Performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry and exit charges that may be paid on the purchase and sale of an investment.
- The Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmark.
- The Fund launched in November 2014 and this share class relaunched in April 2016.
- Performance is calculated in EUR
