£ Returns	Month	2024	Since Inception (1 st October 2008)
B Accumulation	+2.9%	+19.4%	+687.1%
TOPIX Net Total Return	+2.5%	+10.1%	+233.5%

Sources: Bloomberg and Waystone Management (UK) Limited

The equity market traded within a relatively narrow range during the month while Japanese government bond yields rose to their highest level in 14 years. The yen strengthened slightly but persistent weakness has made Japan a popular place for tourists: there were 37m foreign visitors in 2024, up 47% yoy, considerably higher than the previous record number of 31.9m in 2019.

The Bank of Japan (BOJ) raised its policy rate (overnight call rate) by 0.25% to 0.50%. Unlike the move last summer this had been well signalled and had little market impact. The accompanying Outlook Report was relatively hawkish with the BOJ revising up its inflation forecasts to above its target of 2% for the next three years citing labour shortages as a key upside risk to prices.

Japan's unemployment rate remained low at 2.4% in December, with total employment reaching a new record for the third consecutive month. Notably, employment among 15–24 year-olds saw a strong uptick. Base wages rose 2.7% in November, the largest increase in over 30 years. Aeon, the supermarket chain and the largest employer of part-time workers, is set to increase part time wages by 7%, the same as last year. Meanwhile, the number of foreign nationals working in Japan surged by 250,000 to 2.3 million, the largest year-on-year increase since records began in 2000.

We recently met with senior management of our two city bank holdings, MUFG and SMFG. Both highlighted expanding net interest margins following rate hikes and emphasised that achieving a price to book of 1x is "just the beginning." The expectation is for the BOJ to continue normalising interest rates and eventually raise them to 1% which bodes well for their profits.

Fuji Media, in which we are invested, saw its share price surge 27% during the month. The company has been embroiled in a scandal involving employee misconduct and an alleged cover up with the subsequent press conference described as a "car crash". Two directors have resigned so far and customers have been cancelling advertising contracts resulting in a downward revision to profits. We have engaged with the company for many years regarding capital management and board governance, voting against the re-election of directors. The scandal has raised hopes for a corporate governance overhaul and major strategic change. The stock still only trades at 0.5x book value, with net cash covering nearly 60% of its market capitalisation. This news has also led to speculation that other TV companies might come under pressure to realise their undervalued assets.

Last year was a record for Japan-related M&A, partly fuelled by private equity firms acquiring non-core assets as companies sharpen their focus on capital efficiency. This month Bain bid for aircraft parts manufacturer JAMCO and an activist launched an unsolicited tender offer to raise its stake in a JREIT. Recent transactions involving Sapporo and Seibu Holdings have highlighted the valuable real estate held within some Japanese companies.

The unwinding of cross-shareholdings is opening up shareholder registers with, for example, a large placing of Murata shares this month. Companies are increasingly conscious of their share prices announcing share buybacks at an unprecedented rate. NISAs are proving popular with ¥11.9trn invested in 2024 of which 38% was invested in Japanese shares.

In a recent interview with the Financial Times, Takeshi Niinami, president of Suntory and chairman of the Japan Association of Corporate Executives, suggested that Japan is reaching "a tipping point" and predicted that activism, private equity investment and domestic consolidation would continue. From a balance sheet perspective, the average net cash to market capitalisation in the portfolio remains 44%, underscoring the potential for greater shareholder returns. In addition, we see considerable scope for operating margins to improve. We believe corporate Japan is still in the early stages of a multi-year transformation which will result in a significant re-rating of our portfolio.

TOPIX Net Total Return is used for the purpose of performance comparison only as it is a widely used benchmark which includes reinvestment of dividends (net of withholding tax) and which most closely reflects the type of companies in which the fund invests. All performance information is calculated by Morant Wright Management Limited using share price data provided by Waystone Management (UK) Limited. Index data are taken from Bloomberg. Performance is given in sterling terms based on the Fund NAV. Data are as at 31st January 2025 and accurate as at that date.

Disclaimer

Please remember that past performance is not a guide to future performance. The value of the Fund and any income from it can fall as well as rise as a result of both market and currency fluctuations and investors may not get back the amount originally invested. Investors must be willing to accept some risk to their capital. Consequently, the fund may be suitable for investors who are looking to set aside their capital for the longer term (i.e. at least 5 years).

Before making an investment in the Fund you must read the KIID which can be obtained from Waystone Management (UK) Limited (<https://www.fundsolutions.net/uk/morant-wright-management-limited/ws-morant-wright-nippon-yield-fund/ws-morant-wright-nippon-yield-fund/>) or ourselves, along with the Fund Prospectus and the latest report and accounts.
