Topix continued to recover in May, rising 6.2% in yen terms to finish at an all-time high as foreign interest remained strong. The 10-year JGB yield reached 2.8%, its highest level in almost 30 years, on inflation concerns and expectations for further Bank of Japan rate hikes.

Prime Minister Takaichi announced a supplementary budget of just over ¥3trn to resume support for household electricity and gas bills, and to extend the petrol subsidies enacted in March. This can be funded without any revision of planned bond issuance thanks to Japan's shrinking fiscal deficit.

Results announcements for the year ending March 2026 have continued to impress. Aggregate recurring profit growth for the portfolio was 14% and a further rise of 9% is forecast for the fiscal year to March 2027. Speciality chemicals company Zeon reported operating profit growth of 24% and forecast further growth thanks to higher sales of optical films and battery materials. Regional bank Yokohama Financial announced upbeat results due to robust loan growth and expanding net interest margins.

Shareholder returns have been notably strong. Dividends for our portfolio grew 22% and almost every company increased its dividend. Dividend growth for March 2027 is forecast to be 10%. Trading company Inabata upgraded its shareholder returns policy to pay a dividend of 4.0-4.5% of equity while there were sizable share repurchases announced by Amada (8% of shares outstanding) and Tsubakimoto Chain (5%). According to the Nikkei newspaper, buybacks announced by listed Japanese companies in the year reached a record ¥22.3trn, up 18% year on year, which marked the fifth consecutive annual increase. In the portfolio, 70% of companies announced buybacks last year at an average size of 5.4% of shares outstanding, and already 20% of holdings have declared buybacks since April.

More companies have received shareholder proposals ahead of the June AGM season. Kyocera, TBS and Sekisui Jushi are all facing proposals to buy back 10% of their outstanding shares. Kyocera has committed to sell another ¥125bn of its large shareholding in mobile carrier KDDI and is under growing pressure to make more reforms. Elsewhere, an activist is proposing that NHK Spring make its board majority independent and hold its AGM later in the summer so investors can review the annual report (Yuho) before voting. Several of our holdings have recently asked to arrange meetings to discuss our voting intentions, illustrating the growing pressure that boards are facing.

There is considerable scope for consolidation in Japan to improve margins, so it was interesting to see bearing manufacturers NSK and NTN announce plans to merge. The two companies, which are no.1 and no.2 in the domestic industry, generated operating margins of 3.9% and 3.8% respectively in the year just ended. The combined firm will be comparable in scale to Sweden's SKF, the global leader, which generates margins of almost 10%.

Pharmaceutical wholesaler Medipal announced a bid for its listed subsidiary Paltac at a 43% premium. Asset rich Japanese companies are attracting more attention from overseas funds, as Bain Capital has formed a new \$10.5bn Asia fund with plans to allocate half to Japan. Meanwhile, Berkshire Hathaway increased its holdings in Sumitomo Corp and Marubeni to above 10%, meaning it now owns more than 10% of all five major Japanese trading houses.

Underlying profit performance is healthy while balance sheets are strong with net cash and investments worth 33% of market cap at our non-financial holdings. Meanwhile, we expect more M&A to help realise the value in the fund.
